Professional Summary

Information Systems student with hands-on experience in data analysis and business process improvement. Skilled in SQL, Python, Tableau, and Power BI to translate requirements into clear, actionable reporting. Effective collaborator across technical and business teams, targeting entry-level Business Analyst and Data Analyst roles.

Experience

Product Area Manager Co-op Sep 2023 – Mar 2024
Estee Lauder *Bristol, PA*

- Led workplace safety and quality assurance training for a 15-person production line, raising employee compliance by 40% through clearer procedures and hands-on coaching
- Tracked and recorded total production output data per shift, maintaining accurate records to support operational reporting across the production floor
- Partnered with cross-functional teams to design and roll out a new hazard identification process, cutting potential safety risks by 25% across the production floor

Projects

HR Onboarding & Data Optimization Jun 2026 – Jul 2026

- Analyzed new hire performance data using SQL and Python to uncover a 38% probation failure rate and 27% early resignation rate, then traced the pattern back to gaps in the onboarding process
- Built a Requirements Traceability Matrix connecting each business requirement to its supporting user stories and test cases, ensuring every proposed fix could be tied back to a measurable outcome
- Designed a Tableau dashboard for department leads to monitor onboarding outcomes over time, turning a one-time analysis into a repeatable reporting tool

Food Delivery & Session Optimization May 2026 – Jun 2026

- Used SQL and SQLite to trace user drop-off through the checkout flow, isolating the mandatory login step as the primary point where customers abandoned their sessions
- Wrote Agile user stories and acceptance criteria for two proposed features, Guest Checkout and Cart Auto-Save, with scope defined clearly enough to hand directly to a development team
- Built a Power BI dashboard to track the impact of the proposed changes, projecting a conversion lift from roughly 21% to 58% once implemented

Education

Drexel University Philadelphia, PA
Bachelor of Science in Information Systems. *September 2026*
Relevant Coursework: INFO371 Data Mining (Python/Pandas), INFO210 Database Management (SQL), INFO324 Agile Process & Product, INFO310 Human Centered Design (Figma)

Skills

Data & Business Intelligence: SQL, Python, Tableau, Power BI, pandas, NumPy, sklearn, Matplotlib, IBM Cognos Analytics, Google Looker Studio, Jupyter, SQLite
Tools & Platforms: Jira, Agile/Scrum, Lucidchart, Figma, Git, GitLab, VS Code, Oracle, Linux, AWS, Microsoft 365
Programming & Other: JavaScript, HTML/CSS, Java, React, Node.js

Certifications

- Meta Front-End Developer Certificate
- Google UX Design Certificate
